

NEW!

MODEL: VAC ACOUSTICAL LOUVER

- Superior low frequency acoustical performance
- Minimal pressure drop
- Space-saving design
- Economical alternative to silencers
- Options for finishes, materials and acoustical media to suit almost any application
- Lower installation costs
- ASTM E90-2004 certified test results from NVLAP accredited independent laboratory

TESTING BY N.V.L.A.P. ACCREDITED INDEPENDENT LABORATORY

Octave-band	1	2	3	4	5	6	7	8
Frequency (Hz)	63	125	250	500	1000	2000	4000	8000
DIL (dB) at 200 FPM Face Velocity	11	15	23	30	39	42	34	32

Octave-band noise reduction data determined by sound-transmission-loss testing to
ASTM E90-2004

0.14" - WG PRESSURE DROP – as determined by static-pressure testing to
ASTM E477-06a
